Title Lessons for Safer Chemicals in Products – PFAS's

---

Organiser Chemical Watch

---

Location Webinar

---

Details This free webinar from Chemical Watch has been arranged to focus on PFAS's – including concerns and risk reduction approaches to transition to safer alternatives. The programme includes a case study from Chemours which will illustrate how they transitioned from making PFAS's to short chain alternatives.  
The three speakers for this webinar will be:

– **Eeva Leinala** (*Principal Administrator, OECD*), will provide an overview of the issue and regulatory responses, including EU/international/UN/OECD initiative and the scientific background.

– **Ronald Bock** (*EMEA Environmental Risk Manager, Chemours*), will provide a company case study on how Chemours has transitioned from making PFAs to short chain alternatives and developing non-fluorinated alternatives for some uses.

– **Chris Enlow** (*Corporate Social Responsibility Manager, Keen Footwear*), will describe the challenges for shifting to non-fluorinated alternatives for many elements of their footwear.

---

This free webinar will last for 1 hour and 30 minutes and will also include a 30 minute Q&A session, chaired by Chemical Watch's Managing Editor – Emma Chynoweth.

***Please note: If you can't attend the live webinar, do still register, as the webinar recording and slides will be sent to you to view at a time which suits you.***
